Hach FH950 Portable Velocity Flow Meter

Loveland, Colorado March 2012–

Hach Company Flow Meter Products & Services

is pleased to announce the release of its latest flow monitoring innovation, the FH950 Portable Velocity Flow Meter with electromagnetic sensor.

Hach's new FH950 simplifies the velocity measurement process for stream discharge measurements, primary device calibration and sewer spot-check measurements. Step-by-step instructions guide the user through the flow profiling process, and with the ability to log velocity and entered depth information within the meter, field time is cut in half. Discharge calculations are available real-time and collected flow data is conveniently downloaded to a computer via the USB connection, eliminating post-site visit manual data transfer and calculations.

The electromagnetic sensor is disconnectable from the meter, has no moving parts and never requires mechanical maintenance or calibration, making it the lowest maintenance solution on the market.

About Hach Company Flow Products & Services

[Hach Company Flow Products and Services](#), a world-class manufacturer of innovative and reliable open channel flow meters, is the first choice for flow professionals in the wastewater industry. Flow meter innovation, reliability, and accuracy are the hallmark of our products as well as an unrivaled support and sales network. The combined strengths of Hach's Sigma and Marsh-McBirney flow meters provide our customers with over 75 years of flow experience. Hach Company is a wholly owned subsidiary of Danaher Corporation (www.danaher.com), a fortune 500 leader.
