## **Hach FH950 Portable Flow Meter Now Available with Depth Measurement**

**Loveland, Colorado August 2012–**

### **Hach Company Flow Meter Products & Services**

is pleased to announce the release of its latest flow measurement innovation, the Hach FH950 Portable Flow Meter with electromagnetic sensor that now measures both velocity and depth.

The NEW Hach FH950 simplifies set up with its menu-driven user interface. Real-time velocity is graphed on the large color display, giving a quick visual reading of velocity trends. The color bar indicator on the display guides the user to position the sensor at the ideal depth location, making discharge measurement collection efficient and trouble-free.

The Hach FH950 auto-calculates discharge volumes based on USGS and ISO methods. Measurements are easily downloaded to a computer via USB connection--allowing for single person data collection, eliminating the need for manual data transfer from log book to pc, and reducing man-hours 50%.

The electromagnetic sensor has no moving parts and never requires mechanical maintenance, making it one of the lowest maintenance solutions on the market.

### **About Hach Company Flow Products & Services**

[Hach Company Flow Products and Services](#), a world-class manufacturer of innovative and reliable open channel flow meters, is the first choice for flow professionals in the wastewater industry. Flow meter innovation, reliability, and accuracy are the hallmark of our products as well as an unrivaled support and sales network. The combined strengths of Hach's Sigma and Marsh-McBirney flow meters provide our customers with over 75 years of flow experience. Hach Company is a wholly owned subsidiary of Danaher Corporation ([www.danaher.com](http://www.danaher.com)), a fortune 500 leader.
